

Modular Cable System

Box OIL P24 - P50-S

Push-button panel for oil electro-distributors control from 1 to 5 elements.

- Separable intermediate cable with different lengths on request
- The terminal wiring is designed to combine a buzzer and an EVG valve
- Versions with additional functions: ON-OFF

Pulsantiera per controllo elettro-distributori oil da 1 a 5 elementi.

- Cavo intermedio separabile e con lunghezze a richiesta
- Il cablaggio terminale è predisposto per abbinare un cicalino e una valvola EVG
- Versioni con funzioni aggiuntive: ON-OFF

H2O Terminals - Terminali H2O

2

Terminale elettrovalvole con connettore C18 per elettrovalvole e C11 per VP regolazione. Valvola Generale o By-Pass secondo il setting del Box.

3

Terminale per valvole motorizzate con connettore C11 sia per sezioni che per VP regolazione. Valvola G generale o By-Pass secondo il setting del Box.

3A

Terminale per valvole motorizzate con connettore C11 sia per sezioni che per VP regolazione. Senza cavo Valvola G generale.

Connector - Connettori

It reduces the number of power cables, simplifies assembly and, thanks to the co-molding of the material, the connector is more resistant.

Riduce il numero di cavi di alimentazione, semplifica il montaggio e, merito al costampaggio del materiale, il connettore è più resistente.

Emits pulse sound (slow, fast, continuous) with 80-95dB intensity.
Emette un suono ad impulsi (lenti, veloci, continui) intensità 80-95db.
